

TOPMOTIVE at the Automechanika Frankfurt

The first generation of self-learning information systems

Bargteheide, 12.07.2018. TOPMOTIVE is part of the Automechanika again. The market leader in catalog and information systems as well as services for the Automotive Independent Aftermarket (IAM) is presenting its pioneering development from 11th until 15th of September in Hall 4 Booth A12: „NEXT – the first generation of self-learning information systems. Besides the current service and product portfolio, the company also gives deeper insights into the further development concerning product data management and analytic tools. TOPMOTIVE shares a booth with the partners ATR (Auto Teile Ring) and GROUPAUTO International.

TOPMOTIVE is setting another example in the market

The whole IT-sector is discussing about Telematics, Big Data, self-learning systems. For the IAM TOPMOTIVE now has the answer: The developer of software solutions takes more than one step further and presents the first generation of self-learning information systems – including gainful functions such as telematics access, a self-learning vehicle file and the best possible information flow in all directions. The official release is planned for the beginning of January 2019 through wholesalers.

Since 2015, a special team works on the technical concept and the complex implementation of “NEXT”. With the help of surveys in repair shops, more than 300 trainings for wholesalers and repair shops per year as well as based on the tool TM Analytics the company found out, that the market is in need of exactly such a system. “With our innovation we are changing the market decisively. At the Automechanika we will be presenting the prototype for the first time live”, describes Stefan Schneider, member of the management board at the TOPMOTIVE Group.

With all the TOPMOTIVE solutions, the owner-managed company keeps their customer always up to date and convinces with long-term, sustainable systems.

Also with the further development in the area of product data management and analytic tools. The special thing about it: Within the applications, TOPMOTIVE supports all common data formats on the market – additionally to the TecDoc-Standard. Thus, the company offers their clients the best possible freedom within individual solutions and creates competitive benefits. The analytic tool TM analytics makes it possible for wholesalers and the industry to understand and reconstruct the user behaviour of their clients within the information systems.
