NEXT –
Notes Function

WHAT IS THE NOTES FUNCTION?

With the **Notes Function** of **TOPMOTIVE,** users of **NEXT** have the possibility to enter individual notes for a specific article, to save them and to view and edit them at a later time directly in the system. Notes can be stored in both the article or the vehicle area for a specific vehicle type. In this way, the notes appear exactly where they are needed: either directly linked to the respective vehicle type or generally linked to the respective article.

WHAT FUNCTIONS AND BENEFITS DOES THE NOTES FUNCTION PROVIDES?

+ **Article notes:**
Notes can be linked directly to the article. The notes always appears on the respective article, regardless of the search performed.

• **Vehicle notes:**
Notes can be created for specific customer vehicles. The information about the article thus appears exclusively for the specific vehicle type.

• **Optimized information flow:**
stored notes, e.g. on article quality, repair notes or quantity information, can be viewed and taken into account by all workshop employees.

• **Reduced paper management** and **improved** clarity due to digitized notes directly in the system.
