

FAST SUITE

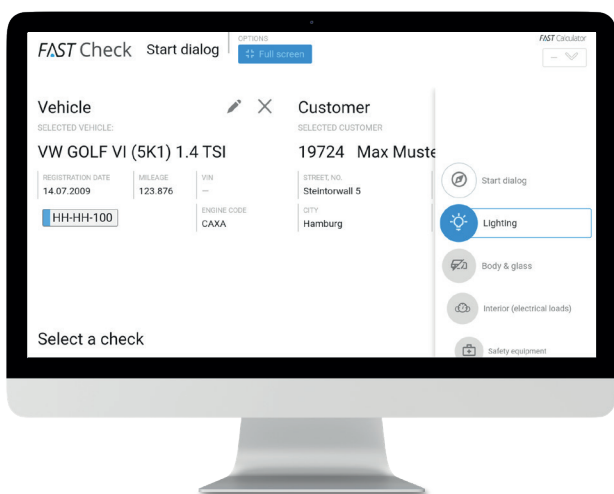

01 WHAT IS FAST SUITE?

Fast Suite is the module line that bundles all TOPMOTIVE Fast products in one package: From dialog acceptance (Fast Check), identification of error codes (Fast DTC), AI-supported repair recommendation (Parts Indicator) and the digital maintenance companion (Fast Service) to cost estimate creation (Fast Calculator). All these functions ensure a complete, transparent and digital workflow within independent workshops. This optimizes processes and significantly increases efficiency. At the same time, cardrivers are involved in a transparent and uncomplicated way. As well as strengthening communication, this also improves customer loyalty.

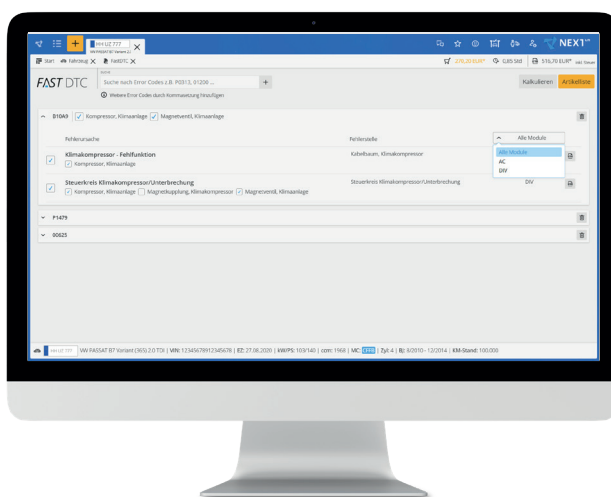

02 WHAT FUNCTIONS DOES FAST SUITE PROVIDE?

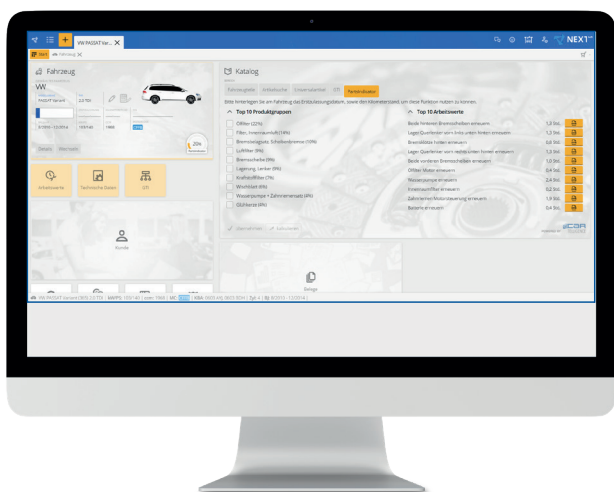

Fast Check supports documentation during vehicle acceptance at the workshop or facilitates a fixed procedure for a vehicle inspection by an official service provider. Fast Check enables the documentation of existing damage prior to the repair as well as a direct calculation of the damaged parts including the time required.

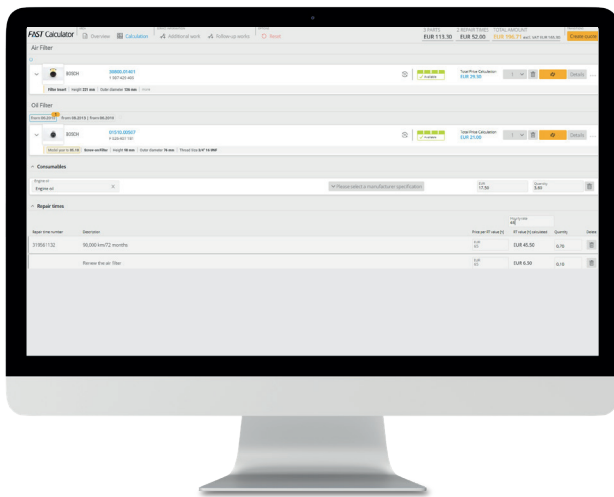

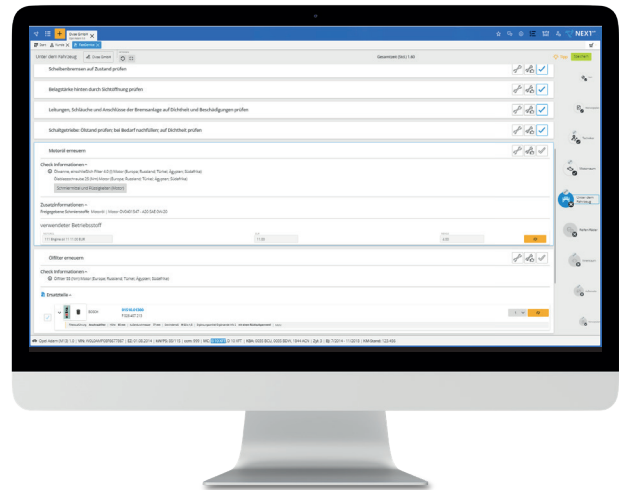

FastDTC enables efficient and fast identification of error codes in vehicles. As usual, any error codes are determined by the workshop employee using the diagnostic device. Once the code has been successfully read out, it can be called up in the TOPMOTIVE catalog via the relevant interface or entered manually. The result: information about the origin/cause of the fault, the relevant product group and the associated technical data. Follow-up processes, such as the creation of cost estimates, can be initiated without interruption.

The **Parts Indicator** is an AI-supported repair recommendation. The function provides active tips and information on which parts groups and / or work items need to be checked on the respective vehicle – not based on information from the manufacturer, but rather made possible by a new algorithm and years of evaluating and checking several million repair cases.

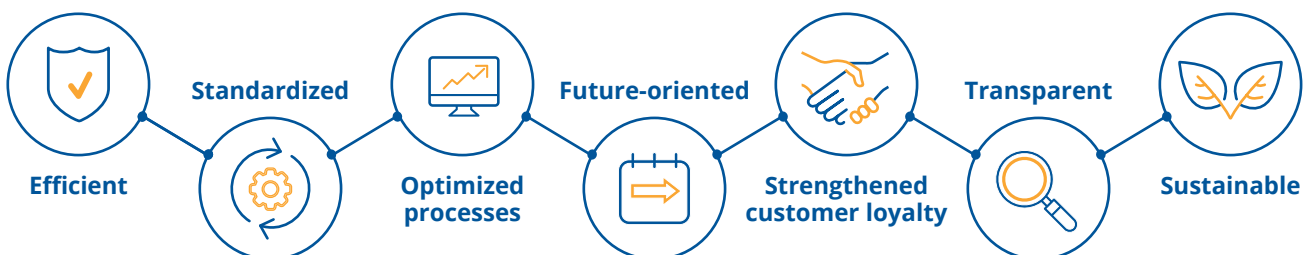

Fast Service enables the workshop to implement a new digital vehicle maintenance process based on OE service data from acceptance to final handover. The entire maintenance workflow is digitally monitored and documented.

The **Fast Calculator** enables garages to calculate a service price with just a few clicks, create a corresponding quote and then order parts and consumables directly from the shopping cart.

03 WHAT BENEFITS DOES FAST SUITE PROVIDE?
