

You want to decrease your return of goods rate? You want to increase your sales? You want to provide more service to your customers? You want to have a competitive advantage with your catalog? IMS supports you in achieving these goals.

By means of IMS, you can improve the data suppliers' catalog data in a simple and efficient way. That will rise you above competition in data quality and reaction rate.

Generate additional benefits with IMS by changing the following article data in your catalog:

+ Attributes

By changing a wrong toothed belt length, engine damages could be avoided

+ Vehicle linkages

Reduce the return of goods by hiding wrong vehicle linkages

+ Text information

Increase the information content by adding hints to the spare parts

+ Media attachments

Add mounting instructions to avoid installation errors

+ References

Increase the hit rate in the catalog and therefore increase sales by adding a new OE number
