NEXT™

THE FIRST GENERATION OF SELF-LEARNING INFORMATION SYSTEMS

topmotive

THE NEXT LEVEL OF TOPMOTIVE SOLUTIONS

Big Data, Artificial Intelligence and self-learning systems – all these topics are being discussed at the moment by the whole IT-sector. For the Automotive Independent Aftermarket (IAM) we have the answer now:
NEXT – the first generation of self-learning information systems.

TOPMOTIVE has been shaping the IAM and the future of information systems for more than 600.000 repair shops, wholesalers and service points since 1994 decisively. Now we go more than one step further and present the next level of TOPMOTIVE solutions. With NEXT we will change the market and you can become a part of it.

WHAT IS THE POTENTIAL OF NEXT?

Self-learning vehicle file

An innovative and highly integrative data model allows portraying OE-Data, IAM-Data as well as other data sources and combining it in the end. The system saves learned knowledge and makes it accessible to the user again.

User Experience and User Interface

Appealing UX/UI design assimilates user and system. For the first time in the market, we realize the needs of the repair shops in an individual, weighted representation.

### Comprehensive BigData Integration

NEXT integrates BigData content at various application points. This enables users to make better decisions and perform even more accurate parts identification and related repair processes. PartsIndicator provides specific parts and labor recommendations based on mileage and vehicle age, based on over 50,000,000 repair cases.

Fast Calculator

The catalog module enables repair shops with only three clicks to calculate a service fee, to create an offer subsequently and to order parts and supplies directly out of the shopping basket afterwards.

WHAT BENEFITS COME WITH NEXT?

- ✔ NEXT is the first information system with **BigData** access.
- ✔ NEXT does the thinking for you and makes the learned knowledge accessible over and over again.
- ✔ NEXT combines all the important functions for your daily business. Additionally, NEXT offers open interfaces for the connection of further applications.
- ✔ NEXT does the work for you, so you can focus on your core business.
- ✔ NEXT is fast, intuitive and reliable.
- ✔ NEXT gives you competitive advantages.
