Graphical Parts Identification Eurotax 3.0

WHAT IS GRAPHICAL PARTS IDENTIFICATION EUROTAX 3.0?

The module integrated into the **TOPMOTIVE** catalogs offers wholesalers and their customers, the garages, the possibility of graphic parts identification based on Eurotax data. The latest generation 3.0 provides even faster and more intuitive access to all vehicle components, their OE part numbers and the linked aftermarket articles.

WHICH FUNCTIONS DOES THE GRAPHICAL PARTS IDENTIFICATION EUROTAX 3.0 PROVIDE?

+ The new **navigation graphic** allows you to activate the main area you are looking for with a single click. The article can be selected via the **more original detailed graphic**.
+ Depending on the area, the selection of the **equipment components** is available to the user.
+ The **comprehensible navigation** provides a better overview of the application and enables the user to switch quickly between the graphic elements within the selected area or to make a new selection using the navigation graphic.
+ Within the detail graphic the user has access to the **OE number** (including the replaced predecessor OE numbers) based link. Afterwards, it is possible to switch to the article list with the converted **aftermarket** articles, including availabilities and prices, by clicking on them.
+ Due to the link to the TOPMOTIVE catalog module **DOM** data is subjected to an additional intensive check, cleansed and standardized – with the goal of offering exact selection options for the respective articles.
+ Through the link to the TOPMOTIVE catalogue modul **Self-learning Vehicle File**, the equipment features or attributes of a corresponding vehicle are collected, structured, stored and made accessible again when called up again from existing internal and external sources.
+ The entire function is available in 15 languages.
