# TOPMOTIVE data

MyTruck+

WHAT IS MYTRUCK+?

MyTruck+ is the extension of **TOPMOTIVE's Truck-VIN-Catalog** for external vehicle identification and spare part search.

Independent truck workshops have the possibility to identify vehicles, not belonging to their own fleet, and to view suitable spare parts for repair. The retrieval of required vehicle or spare part data is transaction-based via the query of the respective VIN. All required data is fully available to the workshop for the duration of the vehicle activation.

WHAT FUNCTIONS AND BENEFITS DOES MYTRUCK+ PROVIDES?

+ **Vehicle identification** and **spare parts search** via VIN for the 7 largest truck manufacturers
+ **Full data access** to external vehicles for 30 days
+ **Vehicle-adminsitration:** overview of all previously identified vehicles incl. relevant and manually entered vehicle data
+ **History function:** uncomplicated reactivation of the vehicle, without loss of information
+ **IAM search tree:** easy switch between manufacturer's own search tree and standardized search tree
+ **No subscription:** vehicle identification is transaction-based
+ **Comprehensive article list** with current availability, orderability and prices
